

Advanced Engineer (mech/el)

Key Responsibilities

- Prepare plans with detailed drawings that include project specifications and cost estimates.
- Design and execute engineering experiments to create workable solutions.
- Develop engineering calculations, diagrams and technical reports.
- Develop 3D models as presentational material.
- Complete required technical and regulatory documents.
- Ensure projects are completed on-time and within the specified budget.
- Present analysis results and project solutions to technical leads, senior leaders and clients as necessary.

Required Qualifications

- Master or Bachelor's degree in Mechanical, Industrial, Design or Electrical Engineering
- 3 – 5 years related work experience.
- Demonstrated proficiency in written and verbal communication (Norwegian and English), including creating and delivering presentations.
- Advanced skills in critical software applications, such as Microsoft Office and AUTODESK, AUTOCAD or SOLIDWORKS.
- Expertise in data and problem analysis, creative problem solving and design thinking.
- Up-to-date knowledge and technical skills required to design and operate our core products and service.

Special Requirements

- Clean record, no former felonies.
- Able to obtain security clearance.
- Passed compulsory military service is a plus but not a requirement.
